

BRAGD Engineering AS

'BRAGD' is the Norwegian term for 'outstanding achievement'.

BRAGD ENGINEERING AS was established in January 2008, but has within a short time become an important player within the oil & gas market, with many interesting customers in our portfolio. Our company consists of people with more than 20 years experience from the engineering business. We know the engineering environment from the inside and know what it takes to find the right people for your company.

Bragd Engineering AS is certified according to Achilles JQS and has implemented an extensive QA system to meet the requirements for both our customers and employees.

BRAGD Engineering AS delivers multi-discipline and special competence within the engineering field in a global market.

Our huge network consists of both Norwegian and international consultants. We have topnotch competence and experience within the oil and gas market, but are also delivering highly skilled engineers within all areas of land-based industry.

We can serve all customers, whether it comes to hiring of consultants for time-limited projects or recruitment assistance to permanent positions.

BRAGD Engineering AS consists of persons with high competence within the engineering field, who have vast experience with shipyards, engineering – and oil companies. We know the processes and aim to support all customers by being a preferred and strategic partner.
